## PREDATOR RIDGE

Beautifully landscaped habitats are home to 14 African species of mammals, birds and reptiles totaling 50 animals including lions, spotted hyenas, and African wild dogs. Predator Ridge also features 10-foot tall mounds for lions to survey their surroundings, electric hot rocks for warmth and a separate maternity den for mothers and future cubs called Pahali Ya Mwana, (pronounced pah-hall-ee yaw mwah-nuh, Swahili for "place of the young.") An interactive discovery center called Pahali Ya Simba (pronounced pah-hall-ee yaw sim-bah, Swahili for "place of the lions") is where visitors can learn about African wild dog and hyena conservation research and watch the zoo-keepers as they work with the lions and wild dogs.
