# Strange Things Afoot

In my entire career as a cryptozoologist, I've never seen an area so rich in cryptid signs and sightings as DZCA. Were these elusive creatures mysteriously drawn to this urban refuge? Do they feel a natural harmony with their fellow endangered species? Do they understand that they are not only safe here... but welcome?

I know the truth lies somewhere within this protected ecosystem—and as a scientist, I have made it my mission to find it. I rely on YOU, Junior Cryptozoologist, to help me collect evidence of their existence.

The Truth is Out There,
